

# LATINOVIC MIROSLAV

## DEVOPS ENGINEER

**E** miroslavlatinovic993@gmail.com

**A** <https://www.linkedin.com/in/miroslav-latinovic/>

**W** [miroslavlatinovic.dev](http://miroslavlatinovic.dev)

### OBJECTIVE

I am an aspiring mid-level DevOps, who always seeks to learn, develop and advance both my own skills as well as the goals of any project I participate in. I pride myself on my professionalism, communication and desire for learning, which have allowed me to advance my career, my skills and my interests.

### EXPERIENCE

#### 2024 - 2025

DevOps Engineer – FindCo

- Migrating app from monolithic legacy to scalable container-based infrastructure
- PHP/Laravel to WordPress migration of the app
- EC2 to ECS migration of infrastructure
- Key technologies – WordPress, ECS, CloudFront, Route53, EC2

#### 2023 - 2024

DevOps Engineer – allOps

- Worked on delivering full-stacked IaC infrastructure through AWS, Terraform and GH Actions and GitLab pipelines
- Worked on moving an infrastructure from single-account, monolithic to IaC backed, multi-account AWS organization app that is highly scalable and highly available
- Key technologies – AWS, Terraform, AWS CodePipeline/CodeBuild/CodeDeploy, EKS (Kubernetes)

#### 2023 - 2023

DevOps Engineer – Trustsoft

- Assisted in delivering infrastructure and pipeline requirements to customers
- Extensively worked in AWS
- Helped with establishing new infrastructures, as well as providing cost-savings in existing infrastructures
- Key technologies – AWS, GitHub Actions, Docker, Terraform IaC

#### 2021 - 2021

DevOps Engineer – TONI Digital

- Assisted in maintaining cloud infrastructure and pipelines
- Helped in optimizing app containerization and build process in CICD
- Key technologies – Azure DevOps, Docker, C#, .NET

#### 2020 - 2020

QA / DevOps – Codaxy

- Manual, and eventually automation test engineer for regression tests

### EDUCATION

“Petar Kocic” Grammar School, Novi Grad

High achieving student with many extra-curricular activities, including

- Debate club
- IT club
- Chess club

### KEY SKILLS

- AWS CLOUD
- TERRAFORM IAC
- DOCKER
- CICD
- BASH / PYTHON SCRIPTING

### CERTIFICATIONS

- AWS ASSOCIATE ARCHITECT
- AWS ASSOCIATE SYSOPS
- AWS PROFESSIONAL DEVOPS

- In implementing tests, I worked closely with DevOps team, gaining interest in participating in a DevOps role
- Key technologies – React JS, Cypress, Linux server administration, Docker, Python

#### **2017 - 2020**

Network Security Tech – NCR Corporation – NSS team

- Assisting on-site technicians in establishing networks and network security mechanisms
- Played a key role in troubleshooting network and security related issues
- Key technologies – hardware firewalls, software security measures, computer networking

#### **2016 - 2017**

Tech Support Agent – NCR Corporation

- Assisted in handling end-users with any technical issues related to their POS systems
- This included handling of Windows servers, as well as the proprietary NCR technology used on these servers
- Key technologies – Windows server management, networking, PowerShell scripting

### **COMMUNICATION**

Throughout my previous work, especially including the role as tech support agent who handled phone calls, I pride myself in being able to handle communication with both my colleagues as well as the end-users, no matter their technical expertise. I have a native-level handling of both Bosnian/Serbian/Croatian languages as well as English spoken and written skills

### **LEADERSHIP**

During my career, I have often had to handle interviewing, training and oversight of junior colleagues. Starting from April of 2025, I am also acting as a user group leader of AWS UG Banja Luka, helping and training aspiring AWS DevOps engineers in gaining their skills and experience.
